# Slide to a new seating experience.

A new fixed seating solution that provides comfort, safety and an organized appearance. The idea for a tracked chair was developed more than 20 years ago. In 1991, Josef Trendelkamp invented Chairtracks to solve a problem for the German Parliament during the German reunification. The problem was that more members needed to fit into the existing parliament yet evacuation aisles had to remain free. In order to work with the available space, the idea of a tracked chair was born so that more chairs could fit comfortably in the same space. Chairtracks thus became the original solution that still functions today in the German Parliament.

Today, Chairtracks are successfully installed in auditoriums, parliaments and conference rooms worldwide. They enable clear, flexible and barrier free design planning; enhanced safety considerations and most importantly a comfortable seating experience. Chairtracks currently offer these outstanding attributes and our engineers continue to design options and functions that will delight our customers and enhance their applications. That is the strength of an original from Trendelkamp.

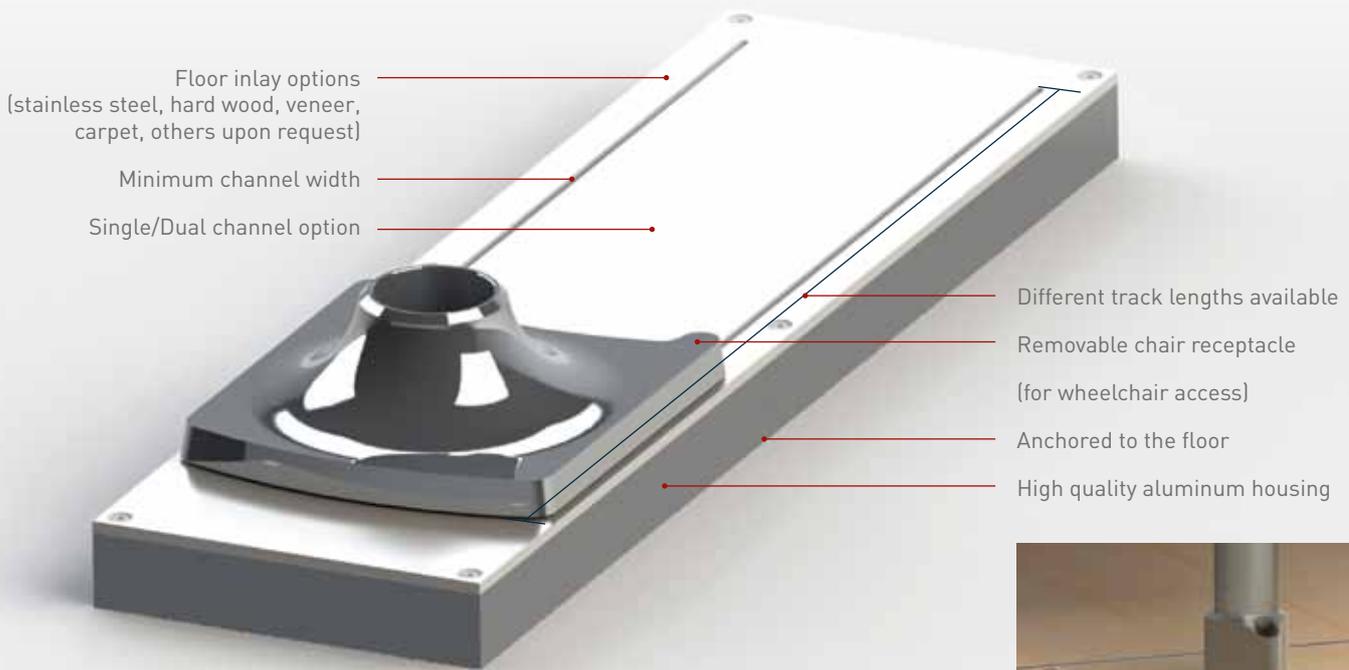

## Trendelkamp Chairtracks. Seating with a system.

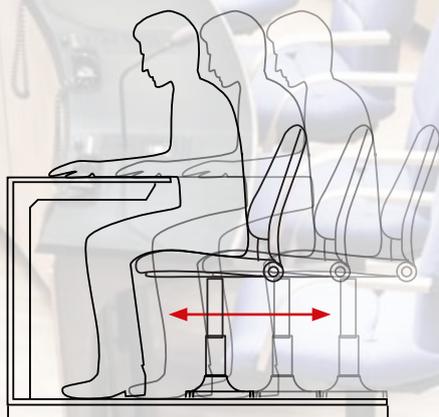

Fixed chairs yet great seating comfort: Yes, it is possible to have both qualities. Our Chairtracks slide gently on a track back and forth. After leaving the chair, the Chairtracks slide automatically back to the home position. The internal retracting mechanism can vary depending on the application so we can offer the right solution for each application. Chairtracks are patented by Trendelkamp and they are a focal point in an auditorium by providing: uniform appearance, easy maintenance and secured escape routes.

## The track of success.

The sliding tracks are in essence – the heart of the system. Chairtracks can be equipped with any chair, so you can select your own model or design.

Installed flush to the floor  
[chairtracks with uniform floor inlay]

## An ergonomic environment.

Sitting, standing, collaborating or relaxing. The Chairtracks experience is comfortable and ergonomic. Trendelkamp provides comprehensive assistance in the form of spatial CAD planning, product specifications, and project management.

## Row after row of advantages:

- **Aesthetic appeal** through a fixed, retractable system.
- **Ergonomically comfortable** through a fixed, retractable system.
- **Safety** since aisles are always kept free.
- **Efficient** through a reduction in time for rearranging chairs and reduced maintenance.
- **Barrier-free design** through removable chair receptacles and minimum channel widths.
- **Warranty** at its best. We are pleased to grant you long-term warranties on our Chairtracks. Our first Chairtracks installed have been in use for almost 25 years.

# At your service for a better seating.

Chairtracks are the ideal solution to bring people together. For instance:

## ... in business.

Meeting rooms, auditoriums, conference centers, corporate offices or command sets.

### Business

## ... in leisure.

Restaurants, cafes, theatres, yachts, casinos or bar stool applications.

### Leisure

## ... in education.

Universities, schools, labs or medical applications.

### Education

### Conference

### Casino

### Atrium

### Auditorium

### Arena/Theatre/Cinema

### Lecture hall

### Meeting

### Yachts

### Group work

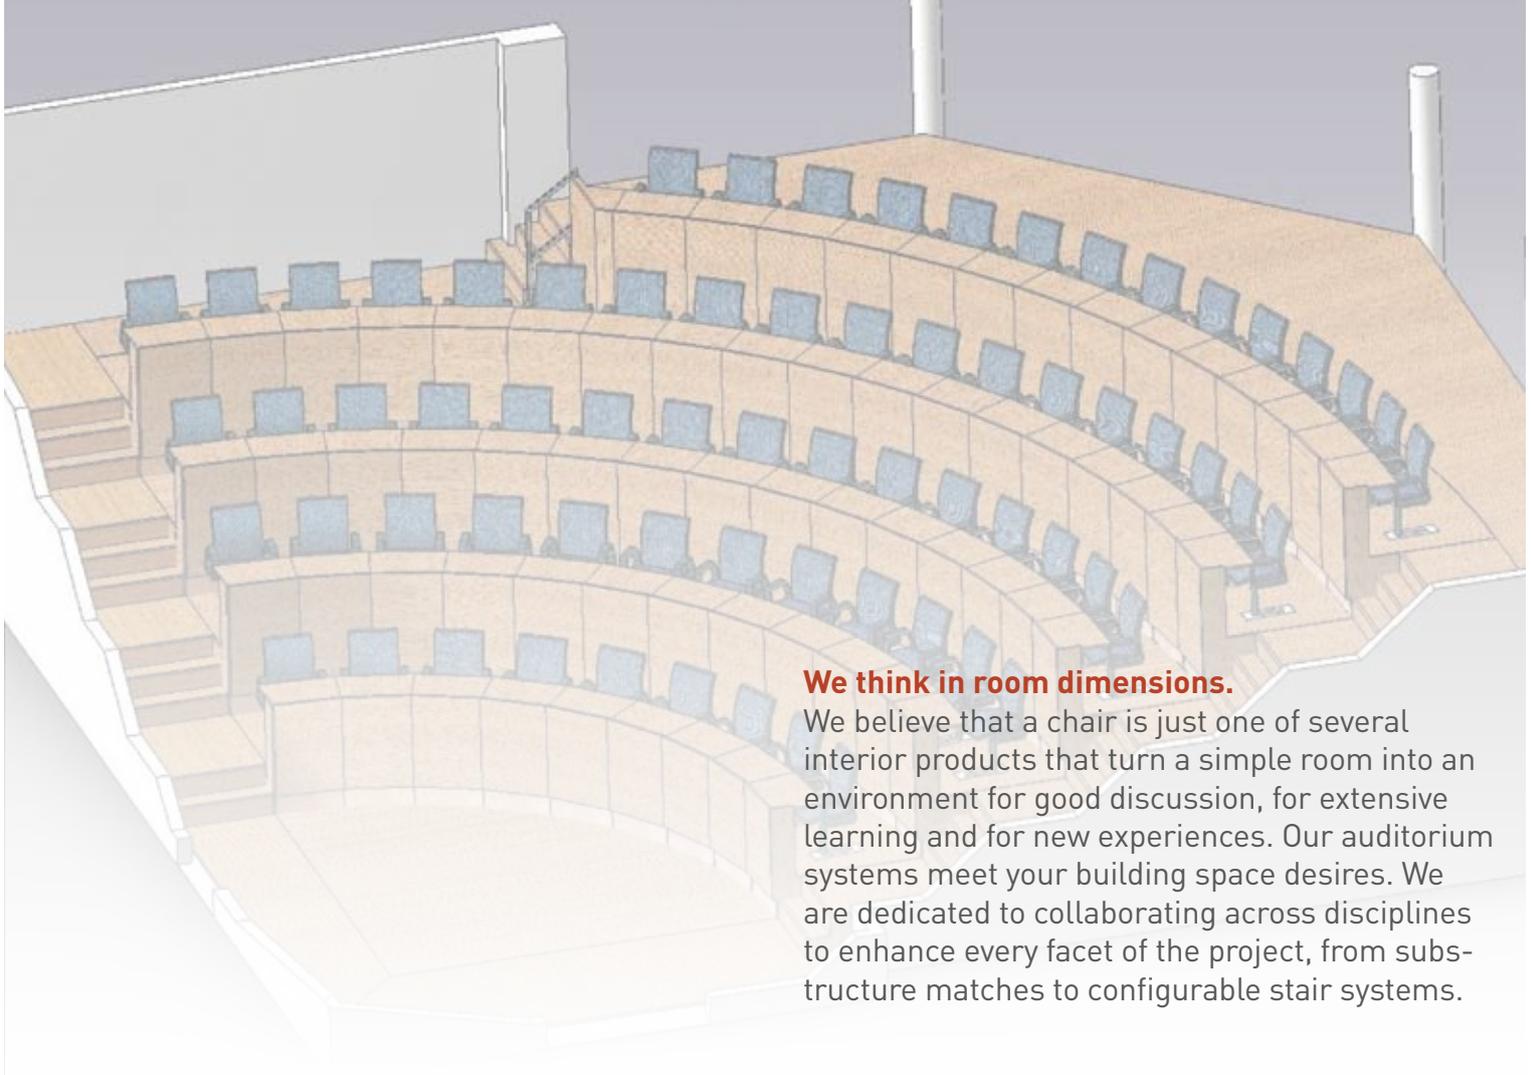

## One source. With passion. With experience.

In hundreds of projects we have proven our dedication and professionalism that goes well beyond the Chairtracks product. We can plan, build and assemble your auditorium. With our extensive engineering capabilities we can design your auditorium sub-structures, develop individual solutions and turn them into reality. Our design team helps you choose the perfect chair and helps you in building your individual tables. Are you looking for long-term warranties and loyal maintenance support? We offer it. This is our dedication since 1897.

**Chairtracks – patented, proven, thousands in use.**

Trendelkamp Chairtracks move people all around the world. We are pleased to share our references with you and take you with us on a journey from Europe to America via Asia and Africa.

**We think in room dimensions.**

We believe that a chair is just one of several interior products that turn a simple room into an environment for good discussion, for extensive learning and for new experiences. Our auditorium systems meet your building space desires. We are dedicated to collaborating across disciplines to enhance every facet of the project, from sub-structure matches to configurable stair systems.

## Auditoriums perfectly equipped.

We have solutions for stairs that turn into a ramp to grant wheelchair access or solutions that adjust the height of the speaker's podium for individual adaptation. The latest tools and technology for presentation, demonstration and discussion are essential for ensuring full functionality of your meeting space. Trendelkamp has the expertise to fill the gap between architect and construction management with coordination of all media selections to ensure nothing falls through the cracks – guaranteed.

### **A solid base for a secure stand.**

Our substructures and wide variety of adjustable flooring options create the perfect appearance while optimizing materials and labor. Trendelkamp can offer a complete turn-key solution for the entire project, from manufacturing through installation. We can apply final floor coverings made from various materials, such as wood, carpet or access flooring.

### **Bringing everything together.**

Turn key projects that move you.

# Our Chairtracks. Your Chair.

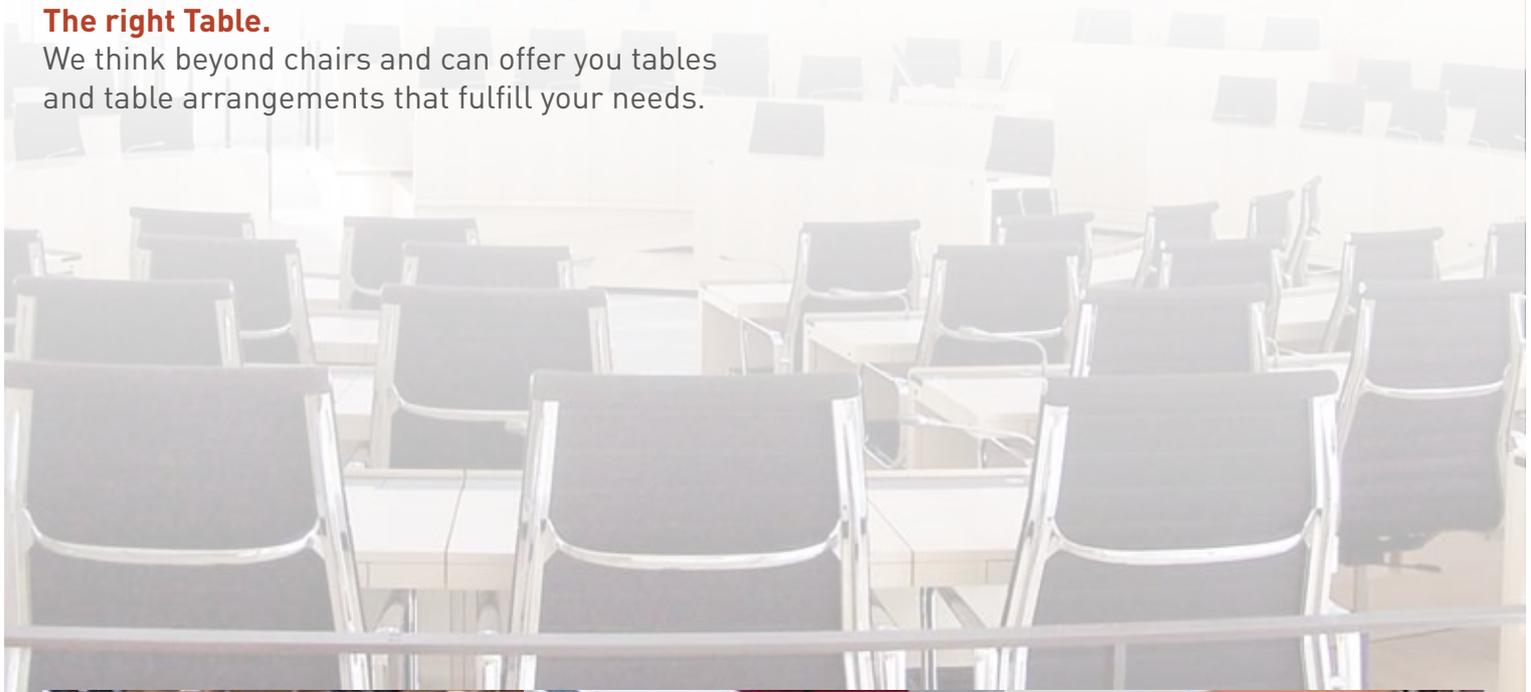

Trendelkamp gives you the choice. You can pair almost any chair with our Chairtracks. We also work closely with the global chair makers so you can choose the chair design you want and we can do the rest.

Design Preferences and System Options	
<b>Track length</b>	<b>standard lengths</b> (custom lengths available upon request)
Short	300 mm [12"]
Medium	380 mm [15"]
Long	450 mm [18"]
<b>Design</b>	
Single Channel Dual Channel	your preference in design

**The right Table.**

We think beyond chairs and can offer you tables and table arrangements that fulfill your needs.

**Bar stool, office chair or executive seat.**

CAD planning is helpful but building a real mock-up is sometimes just as important.

## Barrier-free design. Maximize your freedom.

We design auditoriums that can be easily accessed by foot or wheelchair. Trendelkamp has developed several innovative products for meeting the challenge of access for all. Our dual channel Chairtracks is one of them. The chair receptacle is easy to remove and the narrow channel width is of no concern to wheelchairs, crutches or high heels. Our unique stair conversion system can turn into a ramp and allows everybody to enter each level of the auditorium via the same route. Our compact crane systems that can be hidden in the ground grant you access to any location of the ceiling. All that is possible by simply a push of a button. Do you have your individual design challenge? We are happy to assist you.
